

How to lead the process industry to a safe and sustainable future?

Keynote presentation 23.9.2021 in SIMS EUROSIM 2021 Conference

Jyri Lindholm;

Head of Product Management, NAPCON, Neste Engineering Solutions Oy;

Key words: Training Simulators System, OTS, Artificial Intelligence, Cloud OTS, Field Operator Training

Abstract:

Process safety is an integral part of sustainable business. Cooperation and communication between people throughout the shift is a key part of safety. Safety is as weak as the weakest link. To improve safety, collaboration, and situational awareness, the entire operational shift is placed to practice together in the same training environment. Artificial Intelligence can also be part of building operational safety by utilizing high-fidelity simulators in Machine Learning training.
