

Proceedings of The 61st SIMS Conference on Simulation and Modelling SIMS 2020, Virtual Conference, September 22-24, 2020, Finland

Editors:

Esko Juuso, Bernt Lie, Erik Dahlquist and Jari Ruuska

Published by:

Scandinavian Simulation Society and Linköping University Electronic Press

ISBN: 978-91-7929-731-2

Series: Linköping Electronic Conference Proceedings, No. 176

ISSN: 1650-3686

eISSN: 1650-3740

DOI: 10.3384/ecp20176 and 10.3384/ecp20176+first page number for each paper

Jari Pulkkinen and Jean-Nicolas Louis. Impacts of demand side management programs to domestic hot water heating load profiles in smart buildings	1-8
Elisabet Syverud, Dag A. H. Samuelsen and Jakob Pfaff. Predicting Thermal Losses in a LowEnergy Building	9-14
Ashish Bhattarai, Zahir Barahmand, Sina Orangi and Bernt Lie. Extended model for control of thermal energy in buildings	15-22
Sina Orangi, Zahir Barahmand, Ashish Bhattarai and Bernt Lie. Analysis of model for control of thermal energy in buildings	23-30
Frédéric Poupart, Oda Martine Sundsdal, Marianne Christiansen, Ole Melhus and Arnab Chaudhuri. Numerical analysis of the performance of green facades	31-38
Mads Pagh Nielsen and Kim Sørensen. Dynamic modeling of heat pumps for ancillary services in local district heating concepts	39-46
Jean-Nicolas Louis and Jari Pulkkinen. Multi-Scale Smart Building Simulation Platform for Energy, Market and Automation Solutions	47-54
Marianne Heitmann, Carlos Pfeiffer and Elisabet Syverud. Modelling and Evaluation of Adiabatic Compressed Air Energy Storage (A-CAES) System with Packed Bed	55-62
Signe Thomasen, Kim Sørensen, Carsten Bojesen and Kasper Vinther. Sensitivity Analysis of Optimised Large Scale District Heating Heat Pump Concepts	63-70
Mohammad Sharfuddin and Lars Erik Øi. Simulation of heat recovery from data centers using heat pumps	71-76
Emil Oppegård, Asanthi Jinasena, Anders Hammer Strømman, Jon Are Suul and Odne Stokke Burheim. Study of an Industrial Electrode Dryer of a Lithium-Ion Battery Manufacturing Plant: Dynamic Modelling	77-84
Elena Tomas-Aparicio, Erik Dahlquist, Awais Salman, Selman Ahmeddin and Hussein Abdirizak Mohamed. Complementing existing CHP plants with pyrolysis and gasification to produce liquid biofuels	85-90

Khaled Aleikish, Thomas Øyvang and Bernt Lie. Hybrid model for fast solution of thermal synchronous generator with heat exchanger	91-98
Hamid Asgari, Emmanuel Ory and Jari Lappalainen. Recurrent Neural Network Based Simulation of a Single Shaft Gas Turbine	99-106
Milan Zlatkovikj, Valentina Zaccaria, Ioanna Aslanidou and Konstantinos Kyprianidis. Simulation study for comparison of control structures for BFB biomass boiler	107-115
Willem Meijer and Dietmar Winkler. Modelling of Water Levels in a Reservoir using Modelica	116-124
Madhusudhan Pandey and Bernt Lie. The influence of surge tanks on the water hammer effect at different hydro power discharge rates	125-130
Madhusudhan Pandey and Bernt Lie. Mechanistic modeling of different types of surge tanks and draft tubes for hydro power plants	131-138
Aarne Pohjonen, Vahid Javaheri, Joni Paananen and Juha Pyykkönen. Semi-automatic optimization of steel heat treatment to achieve desired microstructure	139-145
Oskari Seppälä, Aarne Pohjonen and Jari Larkiola. Effect of anisotropic growth and grain boundary impingement on bainite transformation models	146-152
Tomas Lundberg, Joel Orre, Timo Paananen and Olli Mattila. Modelling of the Lime Kiln at SSAB, Raahe	153-159
Jari Ruuska, Eemeli Ruhanen, Janne Kauppi, Sakari Kauvosaari and Mika Kosonen. Multivariate linear regression model of paste thickener	160-164
J. Fredrik Nyholm. Predicting centrifugal compressor off-design operation in an operator training simulator	165-171
Ludmila Vesjolaja, Bjørn Glemmestad and Bernt Lie. Application of population balance equation for continuous granulation process in spherodizers and rotary drums	172-179
Ludmila Vesjolaja, Bjørn Glemmestad and Bernt Lie. Solving the population balance equation for granulation processes: particle layering and agglomeration	180-187
Amir Farzin, Ludmila Vesjolaja and Bernt Lie. Fertilizer Granulation: Comparison of Modeling Languages	188-194
Mathias Poulsen, Kim Sørensen and Thomas Condra. Heat and Mass Transfer Model for Droplets with Internal Circulation	195-202
Fredrik Kasin, Are Larsen, Christian Andersen, Rajan Jaiswal and Rajan K. Thapa. Improving gas distribution and evaporation in gas cooling tower at Norcem Brevik	203-208
Cornelius Emeka Agu, Rajan Kumar Thapa, Christoph Pfeifer, Lars Andre Tokheim and Britt Margrethe Emilie Moldestad. A new Approach for Scaling Up from a Small Cold to a Large Hot Bed for Biomass Conversion in a Bubbling Fluidized Bed Reactor	209-214

Philipp Braun, Martin Sliwinski, Johannes Hinckeldeyn and Jochen Kreutzfeldt. Challenges of CAD conversion to 3D visualisation environments with respect to kinematic dependencies	215-221
Gwen Anderson, Ida Helene Gjerde, Sondre Luca Helgsen, Mladen Jemenica and Rajan Kumar Thapa. ASME B16.9 Piping Components: An Analysis of the Critical Dimensions	222-228
Joachim Lundberg and Zidane Moujahidi. CFD Simulations of Open Drainage System for Offshore Applications (Caission) using OpenFOAM	229-235
Asanthi Jinasena, Håvard Holta, Morten Hansen Jondahl, Prasanna Welahettige, Ole Morten Aamo, Roshan Sharma, Håkon Viumdal and Bernt Lie. Model Based Early Kick/Loss Detection and Attenuation with Topside Sensing in MPD	236-243
Khim Chhantyal, Akash Padir and Kjartan Thor Birgisson. Adaptive Response Time for Integrated Autodriller Controller	244-248
Ali Moradi and Britt Margrethe Emilie Moldestad. Near-well simulation of oil production from a horizontal well with ICD and AICD completions in the Johan Sverdrup field using OLGA/ROCX	249-256
Steven Jackson. Sensitivity Analysis and Case Studies for CO2 Transportation Energy Consumption.	257-263
Christopher Rackauckas, Roshan Sharma and Bernt Lie. Hybrid Mechanistic+Neural Model of Laboratory Helicopter	264-271
Madeleine Martinsen, Erik Dahlquist, Anders Lønnermark and Örjan Säker. DECISION TREE FOR ENAHANCING MAINTENANCE ACTIVITIES WITH DRONES IN THE MINING BUSINESS	272-279
Sabin Bhattarai, Ola Marius Lysaker and Dag Bjerketvedt. Front Tracking of Shock and Combustion Waves by an Optimal Transport Framework	280-286
Vibeke B. Karlsen, Nirmal Ghimire, Rune Bakke and Wenche Hennie Bergland. Anaerobic Digestion of Hemicellulosic Sugars Implemented in ADM1	287-292
Ebrahim Qaredaghi, Sara Ronasi and Britt Margrethe Emilie Moldestad. Simulation of a purification plant for pyrolysis gas based on plastic waste	293-299
Terje Bråthen, Lars Erik Øi and Jon Hovland. Simulation of condensation in raw biogas containing H2S	300-305
Gamunu Samarakoon, Dietmar Winkler, Vasan Sivalingam, Carlos Dinamarca and Rune Bakke. Simple modelling approach using Modelica for microbial electrosynthesis	306-310
Ole Christopher Hansen and Britt Margrethe Emilie Moldestad. Computational study of CO2 injection for enhanced oil recovery and storage	311-317
Solomon Aforkoghene Aromada, Nils Henrik Eldrup, Fredrik Normann and Lars Erik Øi. Simulation and Cost Optimization of different Heat Exchangers for CO2 Capture	318-325
Lars Erik Øi, Nils Eldrup, Solomon Aromada, Andrea Haukås, Joakim Helvig, Anne Marie Lande and Ida Hæstad. Process Simulation, Cost Estimation and Optimization of CO2 Capture using Aspen HYSYS	326-331

Lars Erik Øi and Sofie Fagerheim. Simulation of CO ₂ Absorption at TCM Mongstad for Performance Data Fitting and Prediction	332-337
Jacobus Krige Visser. The effect of input distribution skewness on the output distribution for project schedule simulation	338-343
Mercedes Noemi Murillo Abril, Beathe Furenes and Nils-Olav Skeie. Development of a model to estimate parameters in a snowpack based on capacitive measurements	344-351
Maths Halstensen, Onyinye Victoria Agu, Ulrich Hundhausen and Kim H. Esbensen. Real-time monitoring of wood cladding spray painting properties and nozzle condition using acoustic chemometrics	352-359
Kai Zenger. Notes on the Floquet-Lyapunov Theory of Linear Differential Systems	360-364
Antti Koistinen, Markku Ohenoja, Jani Tomperi and Mika Ruusunen. Adaptation framework for an industrial digital twin	365-372
Esin Iplik, Ioanna Aslanidou and Konstantinos Kyprianidis. Sensor fault detection with Bayesian networks	373-378
Juha Hirvonen, Hannu Hakalahti and Mikko Ylihärsilä. Testing ERP and MES with Digital Twins	379-384
Achref Rabhi, Ioanna Aslanidou, Konstantinos Kyprianidis and Rebei Bel Fdhila. CFD investigations of subcooled nucleate boiling flows and acting interfacial forces in concentric pipes	385-392
Rajan Jaiswal, Rajan Kumar Thapa and Britt Margrethe Emilie Moldestad. Study of agricultural waste gasification in an air-blown bubbling fluidized bed using a CPFD model	393-398
Nastaran Ahmadpour Samani, Chameera K. Jayarathna and Lars-Andre Tokheim. CPFD simulation of enhanced cement raw meal fluidization through mixing with coarse, inert particles	399-406
Nastaran Ahmadpour Samani, Chameera K. Jayarathna and Lars-Andre Tokheim. Fluidized bed calcination of cement raw meal: Laboratory experiments and CPFD simulations	407-413
Nora Cecilie Ivarsdatter Skau Furuviik, Rajan Jaiswal and Britt Margrethe Emilie Moldestad. Comparison of experimental and computational study of the fluid dynamics in fluidized beds with agglomerates	414-420
Krister Jakobsen, Rajan Jaiswal, Nora Cecilie Ivarsdatter Skau Furuviik and Britt Margrethe Emilie Moldestad. Computational modeling of ash melting and agglomeration in fluidized bed gasifiers	421-427
Ramesh Timsina, Rajan K Thapa, Britt Moldestad and Marianne S Eikeland. Simulation of entrained flow gasification reactor with Multi Phase Particle in Cell (MP-PIC) approach	428-434
Jerol Soibam, Rebei Bel Fdhila, Ioanna Aslanidou and Konstantinos Kyprianidis. Sub-Cooled Boiling Heat Transfer with Data-driven Method	435-442
Agnieszka Weronika Lach and Torbjørn Grande Østby. Parameter estimation using Bayesian approach for a model of Pressure Peaking Phenomena-ignited H ₂ releases.	443-450

Maths Halstensen and Simen S. Halstensen. Classification of Gases and Estimation of Gas Flow Rate Based on Unsupervised and Supervised Learning Respectively	451-457
Maths Halstensen, Ulrich Hundhausen and Kim H. Esbensen. Partial least squares PLS1 vs. PLS2 – optimal input/output modeling in a compound industrial drying oven	458-465
Esko Juuso. Intelligent methodologies in recursive data-based modelling	466-474
Jayanta Kshirsagar, Harshal Hayatnagarkar and Akshay Dewan. EPIRUST: TOWARDS A FRAMEWORK FOR LARGE-SCALE AGENT-BASED EPIDEMIOLOGICAL SIMULATIONS USING RUST LANGUAGE	475-482
Halvor Nybø Risto, Steven Bos and Henning Gundersen. Automated synthesis of netlists for ternary-valued n-ary logic functions in CNTFET circuits	483-485
