Author Instructions

Abstracts

The abstracts are written in pre-defined text fields in the EasyChair submission system. It is suggested that you write your abstract in a Word-processing software and then copy-and-paste into the appropriate fields in EasyChair. The pdf attachment that is asked for is related to the full paper submission in case of abstract acceptance. No abstract pdf should be attached.

The abstract submission should include the following:

- Author names, email address, country and affiliation. The first author is responsible for ensuring that all authors have agreed to be co-authors. Please mark who is the corresponding author.
- Title which clearly indicates the research topics.
- Abstract text with maximum 250 words. Please include background, aims, methods, results (preliminary or final) and short discussion.
- 3-5 keywords.

Please note the possibility to submit an extended abstract instead of a full paper, particularly for topics of significant industrial relevance. A special track "Presentation of emerging research" is planned for, which can be a summary of previously published work within an emerging research topic. You will still need to submit a 250-word abstract by February followed by the extended abstract in May. The extended abstract will be part of the conference proceedings.

Full Length Papers

- To meet the submission deadline authors must submit an abstract by **March 10, 2023,** and then a corresponding Full Paper by **May 15, 2023.**
- Abstracts will undergo a preliminary review to determine their relevance to the conference, and acceptance of an abstract does not guarantee acceptance of the full paper.
- If you already have a full paper ready, you are welcome to submit the full paper directly. However, your first submission should be done by the Abstract deadline.
- All required metadata and author information should be included, and the conference template should be used as a guideline. The length of the papers should be 6 to 8 pages. Please submit a single pdf file.
- Do not create a new profile when you submit the full paper for an already submitted abstract.
- Once the full manuscript has been submitted, the submission is complete and ready to be reviewed.

Final Papers

The final paper must be submitted in camera-ready format before August 20, 2023, and all papers must be presented live at the conference. Presenters are advised to prepare a 15 to 20 minutes presentation, followed by an 8 to 10 minutes Q&A session.
